2019 Staff Climate Survey Results TAMUG Student Affairs Department Report

In January 2019, all (183) Texas A&M University-Galveston (TAMUG) staff members were invited to participate in a Staff Climate Survey by the TAMUG's Human Resources Department. Usable responses were gathered from 127 staff, resulting in an overall 610% response rate. Participants included staff from the TAMUG campus. Demographics of the 2019 survey respondents are reported on page 3 of this report. Similar surveys were administered in 2012, 2015, and 2017.

Starting on page 5 of this report, descriptive statistics are organized by Survey Responses (Overall, Sex, and Race), Other Work Satisfaction & Engagement, Department Diversity Climate, University Diversity Climate, Mistreatment & Discrimination, Bullying, Incivility, and Safety to better enable strategic decision-making.

Almost all items in the survey used a 5-point response scale from 1 being "Strongly Disagree" to 5 being "Strongly Agree." For the means created from this scale, higher means indicate higher agreeance. Scale level scores are the arithmetic mean across the items in the table. Note that negatively worded items relative to the rest of the scale [indicated as (R) next to the item text] were reverse-scored when aggregated together to form a construct score but are reported as they are written for frequency counts (i.e., "strongly disagree" to a negatively worded item is an indicator of something *positive*). Respondents were not required to answer every item. Therefore, the amount of missing data varies across questions. Additionally, percentiles can add to more than 100% due to rounding.

Here is a sample table with key components highlighted.

Helpful Definitions:

Autonomy – degree to which a job provides substantial freedom, independence, and discretion to the individual in scheduling work and procedures to carry out work₁.

Proactive Personality – behavior of people who take initiative to improve and/or influence their environments₂. *Job Involvement* – degree to which a person identifies psychologically with their work, or the importance of their total self-image₃.

Incivility – low intensity deviant behaviors in violation of workplace norms of respect with ambiguous intent to harm another person (e.g. rude and discourteous behaviors with lack of regard for others)₄.

Neglect - lax and disregardful behavior (e.g., lateness, absenteeism, and use company time for personal business)5.
