It's Time to Think Ocean
Undergraduate Research at TAMUG

**TIO Undergraduate Research Fellows**

The purpose of the TIO Undergraduate Research Fellows is to provide research experience for undergraduate students. Recipients are required to present project results at the TAMUS Student Pathways Symposium or at the TAMUG Student Research Symposium.

To be eligible, students must be a Junior or Senior, registered full-time, have a GPA ≥ 3.00 overall A&M, have a faculty sponsor and be available to work on the project at least 10 hours/week.

The recipients are paid as a student technician at $9/hr.

**TAMU Undergraduate Research Scholars**

Undergraduate students can apply to the Texas A&M University Undergraduate Research Scholars program offered through College Station.

Students can receive up to a $300 reimbursement for research-related expenses. Scholars' individual team members can receive up to $500 each.

Applications are accepted annually, at the end of spring semester and early fall semester, from qualified juniors and seniors.

http://www.ugr.tamu.edu

**Research Advisory Committee Travel Grants**

The Research Advisory Council provides some support for student travel to meetings if they are presenting research results.

To be eligible, students must be a presenting author. Travel support is typically limited to $500.

Students must be nominated by a TAMUG Principal Investigator (PI). PIs may nominate one student per year.

Requests should be submitted 1-2 months in advance of the travel by email to Dr. Tammy Holliday in the Research and Graduate Studies Office.

hollidat@tamug.edu.

**Academic Research Opportunities**

Students may have the opportunity during their academic career at TAMUG to participate in research with departmental faculty.

Students may participate in research and internship activities by registering in the following coursework:

- 484: Undergraduate Internship
- 485: Directed Studies
- 491: Research

Students should inquire about these opportunities in their academic department.

**TAMUG Annual Student Research Symposium**

The Student Research Symposium is open to all TAMUG-based students, with separate categories for undergraduate and graduate students, and will provide the opportunity to present research in a poster format.

Participants are encouraged to present results from their current research projects, even if it is preliminary research as these presentations will provide the student researcher the opportunity to discuss their research with other participants and faculty.

In addition, the Symposium will provide a venue for the exposure of student research to the broader TAMUG community. There will be no registration fee for the symposium.
