### **TAMUG Waterfront Operations Voyage Planning**

## Texas A&M University at Galveston Voyage Planning

#### **Purpose:**

Outline procedures for the operators of all Texas A&M University at Galveston (TAMUG) vessels to make them aware of potential hazards to vessels, and personnel while vessels are away from TAMUG's Normal Operating Area.

#### Scope:

This instruction covers the operation of all vessels

#### **Normal Operating Area:**

The Normal Operating Area for all vessels operated by TAMUG Waterfront Operations is defined as all waters encompassing Galveston Bay within the boundaries of:

- 1. a line drawn, bearing 209°T, from the Eastern most tip of Galveston Jetty across to the Eastern most tip of the South Jetty,
- 2. a line drawn, bearing 075°T, from the South-eastern tip of the Texas City Dike to Lighted Buoy 19 North-west of Port Bolivar and extending to shore on the same bearing,
- 3. a line drawn, bearing 035°T, from shore on Snake Island though Lights 15 and 14 on the Texas City Channel continuing to shore on the Texas City Dike,
- 4. and within the channel of the Intracoastal Waterway going west from the Galveston Causeway Bridge to buoys 57 and 58.

#### **Outside the Normal Operating Area:**

When intended use of the vessel extends past the boundary lines, the vessel Master/operator is required to provide a detailed Voyage Plan one week prior to the scheduled date of departure. The Voyage Plan will be submitted to the Vessel Operations Manager or Executive Director of Waterfront Operations for review and approval.

## **TAMUG Waterfront Operations Voyage Planning**

# **Waterfront Operations Master/Operator Voyage Plan**

Submitted by	Date	Approved by	Date
Date and times of voyage			
Vessel	_		
Master/Operator Name			
Experience of operator	r on route requested (C	ircle one)	
Beginn	er Intermediate	Advanced	Expert
Include printed chartlet of	area of operations with	route and stations identified	fied (drawn)on the chart
For chartlet use http://	www.nauticalchartsonl	ine.com/charts/NOAA/Gu	<u>ılf-Coast</u>
Include Latitude (Lat.)	and Longitude (Long.	) of stations	
Include estimated time	es for launch/ recovery/	underway/ mooring	
What is the predicted wear	ther for the voyage per	od? Can the vessel hand	le expected conditions?
Steps taken to mitigate we	eather impact		
What are the predicted wa	ter conditions? Will tie	des and currents affect yo	ur plan s?
What is the expected vesse	el traffic during voyage	?	
What are potential hazards	s along your route?		
What are harbors of safe r	efuge along the route?		
Where can you get fuel if	needed along the route	?	
	_		
Is this vovage covered in o	our Sea Tow membersh	in (circle one) Yes	No

#### **TAMUG Waterfront Operations Voyage Planning**

The following is applicable depending on route
List of bridges with vertical and horizontal clearances
Bascule, Lift, Draw, and Swing bridge operation parameters and restrictions
List of locks and their operation parameters and restrictions
VHF channel for each bridge and lock if applicable

A copy of this voyage plan must be on the vessel for the voyage approved. The master will be imaged and filed

A thorough review of the waterways in which operations will take place is highly recommended for the safety of the people on board and the vessel itself. Information about all navigable waterways can be found in;

- 1. Notice to Mariners (msi.nga.mil/NGAPortal)
- 2. Local Notice to Mariners for Eighth District Gulf Coast (www.navcen.uscg.gov)
- 3. U.S. Coast Pilots 5 (www.nauticalcharts.noaa.gov/nsd/coastpilot\_w.php?book=5)
- 4. Waterway Guide Southern- Florida and Gulf Coast to Texas
