Advising Pathway from College of the Mainland

Students who begin in the Associate of Arts in Business program at College of the Mainland can transition seamlessly into the Texas A&M University at Galveston Bachelor of Science in Maritime Business Administration.

All credits in the A.A. program currently apply directly to the B.S. program, with no hours or time lost. Students who complete their time at San Jacinto College with a minimum of 24 credit hours and at least a 2.5 GPA are admissible to this Bachelor's program.

Common Career Options

- Domestic & International Shipping
- Port & Waterways Management
- International Trade
- Finance & Accounting
- Vessel Logistic Management
- Safety & Security Management
- Brokerage & Chartering
- Military Service
- State and Federal Agencies

Bachelor of Science Maritime Business Administration

Maritime business administration is a specialized field of study that focuses on managing and administering businesses and organizations operating within the maritime industry. It combines core business principles with specialized maritime operations, logistics, and international trade knowledge to prepare students for leadership roles in maritime-related businesses, port management, shipping companies, logistics firms, and government agencies.

Maritime business administration is essential for the efficient and sustainable operation of the maritime industry, supporting global trade, economic development, regulatory compliance, innovation, and risk management. By managing business operations effectively, maritime administrators contribute to the resilience, growth, and prosperity of the maritime sector and the broader economy.

Demand for maritime business administration professionals is high as major economies participate more fully in world-wide economic growth. American port activity is expected to more than double in the next 20 years which firmly secures career opportunities and development in this sector.
