

## Douglas Lang '26 Endowed Scholarship

Established in 2024 by Dr. Donna C. '88 and David Lang

Most of you know her, but Dr. Donna Lang '88 holds a bachelor's in maritime administration from Texas A&M University at Galveston and currently serves as the associate vice president for academic operations at the Texas A&M-Galveston campus. Dave Lang holds a bachelor's in communications from the University of Louisiana at Lafayette and currently serves as the director of property services for Regional Healthcare Properties at The University of Texas Medical Branch. Earlier this month on ring day, they surprised their son, Douglas Lang '26, with an endowed scholarship in his name!

A Galveston native, Douglas graduated from Ball High School and is currently studying marine engineering technology at Texas A&M Galveston. He loves the water and spends as much time as possible either hunting or fishing.

Donna and Dave established this scholarship to uphold their family's Aggie core value of selfless service and give their son an opportunity to begin giving back. Donna has witnessed the profound impact that endowed scholarships can have on current students and the incredible opportunities they provide as they continue in perpetuity.

With deep roots in the Galveston community, their hope is that this scholarship will enable local students to attend the Galveston campus, just like their son.
