

MINORS OFFERED

This minor gives students a solid foundation in the principles of modern industry administration with a focus on maritime commerce. A minor in maritime business administration gives students a solid foundation in areas concerning maritime business, such as accounting, management, and port operations.

18 credit hours: 9 required, 9 elective.

Acquire a firmly grounded understanding of cybersecurity, focusing on those issues related to maritime, including cyber ethics. The need for this minor in the maritime industry is because of the increase in reported attacks that shut down the electronic positioning software systems on ships, making them vulnerable to attacks that could modify files and charts, causing the potential for severe damage.

15 credit hours: 6 required, 9 elective.

A minor in economics gives students a multifaceted education of various types of economic principles through strenuous courses. The minor works well with people seeking degrees that are strongly linked with industry and commerce, such as maritime business administration.

15 credit hours: 9 required, 6 elective.

For opportunity seekers and creators that identify, evaluate, and implement innovative, value-added solutions. The coursework encourages students not only to take an interdisciplinary approach to understand current trends in logistics, but also to critically reflect upon the methods of study they employ, and the future of maritime business administration as a field.

15 credit hours: 6 required, 9 elective.

All majors are welcome to declare these!
