SEA CAMP 2024
Marine Adventure Camps for Youth!

Ocean Convection Camp (11-14)
Ages 11-14
June 16-22
Condition bands and a new experimental system to study convection in the marine environment. The course will involve hands-on training in everything you will need to know about the marine environment. Course includes field trips to local marine areas and the Texas Intracoastal Waterway. The course will also include experiments to study the dynamics of marine convection. The course is designed for students with a background in oceanography and ecology.

Oceanography (11-14)
Ages 11-14
June 16-22
Dive deep into the world of oceanography. Learn about the different components of the ocean and how they interact. The course will also cover topics such as marine biology, physical oceanography, and the marine environment. The course is designed for students with a background in science and a love for the ocean.

Coastal Photography (11-14)
Ages 11-14
June 16-22
Digital Art for Cell Phones
Ages 15-18
June 16-22
Online
Wetland Photography
Ages 15-18
June 16-22
Online
Exploration of the coastal wetlands of Galveston and Texas City. Students will learn how to capture the beauty of the wetlands using digital photography. The course is designed for students with a background in photography and a love for the outdoors.

Swimming with Dolphins (12-18)
Ages 12-18
June 21-27
Learn about marine mammal science and the different species of marine mammals found in the Gulf of Mexico. The course will also cover topics such as marine biology, conservation, and the marine environment. The course is designed for students with a background in science and a love for marine mammals.

Wildlife Photography (11-14)
Ages 11-14
June 16-22
Explore the world of wildlife photography. Learn about the different techniques used to capture the beauty of the wildlife. The course will also cover topics such as photography, conservation, and the marine environment. The course is designed for students with a background in photography and a love for wildlife.

Wildlife Art (11-14)
Ages 11-14
June 16-22
Combine your love of art and nature in the wildlife art camp. Students will learn how to create art using the wildlife found in the Gulf of Mexico. The course is designed for students with a background in art and a love for the outdoors.

Sea Camp is the perfect camp for you if you are interested in helping animals. This camp is based on the idea of marine mammal science and conservation. This camp is designed for students interested in marine mammal science and conservation.

Marine Science Research (14-18)
Ages 14-18
July 21-27
Study the marine environment and marine scientists. Learn about marine biology, marine chemistry, and marine ecology. The course will also cover topics such as marine pollution, marine conservation, and the marine environment. The course is designed for students with a background in science and a love for the ocean.

Wildlife Photography (14-18)
Ages 14-18
July 21-27
Explore the world of wildlife photography. Learn about the different techniques used to capture the beauty of the wildlife. The course will also cover topics such as photography, conservation, and the marine environment. The course is designed for students with a background in photography and a love for wildlife.

Wildlife Art (14-18)
Ages 14-18
July 21-27
Combine your love of art and nature in the wildlife art camp. Students will learn how to create art using the wildlife found in the Gulf of Mexico. The course is designed for students with a background in art and a love for the outdoors.

Sea Camp is the perfect camp for you if you are interested in helping animals. This camp is based on the idea of marine mammal science and conservation. This camp is designed for students interested in marine mammal science and conservation.

Career-Oriented Residential Camps for High Ability Students Ages 14 - 18

Marine Biology Research (14-18)
Ages 14-18
June 14-20
Explore marine biology and ecology in the Gulf of Mexico. Learn about the different components of the marine environment and how they interact. The course will also cover topics such as marine biology, marine chemistry, and marine ecology. The course is designed for students with a background in science and a love for the ocean.

Marine Engineering (14-18)
Ages 14-18
June 14-20
Explore the world of marine engineering. Learn about the different components of marine engineering and how they interact. The course will also cover topics such as marine engineering, marine chemistry, and marine ecology. The course is designed for students with a background in engineering and a love for the ocean.

Wildlife Sciences Research (14-18)
Ages 14-18
June 14-20
Explore wildlife sciences and ecology. Learn about the different components of the wildlife sciences and ecology and how they interact. The course will also cover topics such as wildlife sciences and ecology, marine biology, and marine chemistry. The course is designed for students with a background in science and a love for wildlife.

Veterinary Medicine (14-18)
Ages 14-18
June 14-20
Explore veterinary medicine and animal science. Learn about the different components of veterinary medicine and animal science and how they interact. The course will also cover topics such as veterinary medicine and animal science, wildlife sciences, and marine biology. The course is designed for students with a background in science and a love for animals.

Sea Camp is the perfect camp for you if you are interested in helping animals. This camp is based on the idea of marine mammal science and conservation. This camp is designed for students interested in marine mammal science and conservation.
